The DentaQuest Partnership for Oral Health Advancement, a 501(c)(4) nonprofit organization, is laser-focused on transforming our broken health care system to enable better health through oral health. Prioritizing person-centered care, the DentaQuest Partnership drives health system transformation at the local, state and national levels in pursuit of DentaQuest’s common mission—to improve the oral health of all.

We are passionate about and committed to revolutionizing oral health to create an effective and equitable system that results in improved oral health and well-being for everyone.

The DentaQuest Partnership leads this revolution through grantmaking, research, care improvement initiatives, and is a leading voice in three high-impact areas of focus.

- Establish a single, national oral health measurement system
- Pursue person-centered models of care through interprofessional practice and value-based transformation
- Advocate for a public adult dental benefit to expand access

Visit dentaquestpartnership.org for more information and to sign up for industry news and updates.
MORE Care (Medical Oral Expanded Care)
MORE Care is a person-centered oral health model focused on increasing access to care and driving systems change through the integration of oral health into primary care practice and the development of oral health care referral networks. We are currently partnering with primary care clinics and dental providers in three states to help spread this interprofessional practice model. Visit dentaquestpartnership.org/ipp for more information.

Dental Caries Management Virtual Practicum
Dental Caries Management (DCM) is a care approach in which patients have a central role in their own health and health care. The DentaQuest Partnership’s Dental Caries Management (DCM) Virtual Practicum was created to support the efforts of dental practices that are implementing a caries disease management program. Visit dentaquestpartnership.org/dcm to access this resource.

Oral Health Value-based Care Training Program
This training program is focused on educating and empowering providers, administrators, payers and other oral health stakeholders around the implementation of value-based care in oral health. The training program highlights best practices designed to support an efficient and effective dental program today and in preparation for transitions in payment and care delivery. We offer a readiness assessment and other tools to support competency development. Topics include practice management, interprofessional practice, HIT interoperability, measurement and social determinants of health. Contact partnershipinfo@dentaquest.com to learn more.

Continuing Education Webinars
The DentaQuest Partnership offers continuing education webinars that highlight the work we are doing in each of our key areas of focus, along with the work our partners are doing across the country to revolutionize oral health. To register for upcoming webinars and to view past webinars, visit dentaquestpartnership.org/webinars. (Dental CE credit only available for live webinars.)

Adult Dental Benefit Advocacy
The DentaQuest Partnership continues working with partners to advocate for the inclusion of a public adult dental benefit in both Medicaid and Medicare. We hosted a national webinar highlighting a toolkit available to advocates and policymakers and continue to work on showing the importance and necessity of an adult dental benefit to improve health and reduce costs. Sign up for our email list by visiting dentaquestpartnership.org and clicking on “subscribe” in the top right corner.

Online Learning Modules
Through self-paced, interactive online learning modules, providers and other health care team members can learn more about evidence-based prevention, best practices for the effective management of safety net dental programs, the integration of oral health care into primary health care, oral health care delivery and payment reform, and much more! Visit dentaquestpartnership.org/online-courseware to access these free continuing education resources today! ADA Continuing Education credit is available.

Analytics & Evaluation (A&E)
Our A&E team drives systems change through the creation and dissemination of actionable research, analytics and evaluation to revolutionize oral health. Visit dentaquestpartnership.org/research to view our latest research materials, including reports on interprofessional practice, opioid prescribing patterns, value-based care, dental utilization and out of pocket costs among those at low-incomes.

Strategic Grantmaking
The DentaQuest Partnership for Oral Health Advancement is committed to making investments that improve and strengthen systems that can create better oral health for all. We are guided by a vision of communities where everyone has equitable access to the knowledge, support and resources to attain optimal oral health as a part of overall health. We believe we can be most effective by targeting multiple systems that affect health outcomes, including policy, funding, care and community. Visit dentaquestpartnership.org/grantmaking for more information.
