

TELEDENTISTRY: REDEFINING PATIENT CENTERED CARE

Sharity Ludwig, EPDH, MS
July 25, 2019

Beyond incremental shifts in how we deliver, we are innovating and **fundamentally changing the system**

TO REVOLUTIONIZE ORAL HEALTH FOR EVERYONE BY REDEFINING PREVENTION AND CARE

Our purpose puts a bold new stake in the ground, but our inclusive mission — **to improve the oral health *of all*** — remains the same

Ultimately, we are driven to **shift the paradigm of oral health care to revolve around prevention** across benefits, care delivery and impact

Why Teledentistry?
