Course Title: *Oral Health Value-based Care: Transformation in Practice*

**Credits:** 1 Continuing Education credit is available upon successful completion of this course.

**Course Description:**

Our current system of care and reimbursement in healthcare was developed back in the 1960s and hasn’t changed much since. Under this model, we’ve gotten paid based on the quantity of services we provide, and we’ve had to treat patients based on what is reimbursed. Times have changed. Shouldn’t our model of care and reimbursement change, too?

In this module, you’ll meet real people—innovators who have important stories to tell about the challenges and rewards of transitioning to a value-based approach to oral healthcare. You’ll hear real stories of how value-based care models across the United States promote wellness, foster collaboration, provide access, create efficiency, and empower both patients and providers. By the end of this module, you’ll have a vision of what the future can look like and a better understanding of how to get there.

**Educational Objectives:**

After completing this module, you will be able to:

- **Discuss** the liabilities of the current system of healthcare in the United States
- **Describe** the differences between the traditional model of care and value-based care
- **Identify** five key areas you must consider when transitioning to a value-based model
- **Print out** your notes to keep as a reference or to share with others

**Teaching Methods:** Self-instructional

**Authors and Reviewers:**

The following people have contributed to the creation of this *Oral Health Value-based Care: Transformation in Practice* online learning module:
DentaQuest Employees

Danielle Apostol
Training Specialist, Oral Health Value-based Care

Sean Boynes, DMD, MS
Vice President, Health Improvement
