# RESPIRATORY PROTECTION PLAN (RPP) CHECKLIST

PLACE A CHECK MARK IN THE BOX ONCE THE TASK IS COMPLETED.

- Develop and implement a written Respiratory Protection Program that meets the requirements listed in the Occupational Safety and Health Administration (OSHA) Respiratory Protection Standard 29 C.F.R.§1910.134.

- Identify the Respirator Program Administrator (RPA).

- Perform the required hazard assessment to identify potential respiratory exposure risks and outline appropriate respirator(s) for use.

- Select NIOSH approved filtering facepiece respirator based on airborne contamination risk(s) identified through the hazard assessment.

- Provide the OSHA Respirator Medical Questionnaire to identified employees and facilitate a confidential review of the document by a physician or licensed health care professional.
  - Protect worker confidentiality: employer/supervisor may not see completed form.

- Once medical clearance has been provided perform fit testing on impacted employees.

- Provide required training prior to use of the selected respirator during an aerosol-generating procedure or in an area of risk of exposure to an airborne transmissible disease.

- Routinely evaluate the proper use and disposal of single-use respirators.

- For reusable devices ensure proper cleaning, disinfection and storage is performed based on the manufacturer’s instructions for use.

- Ensure recordkeeping requirements outlined in the written plan are followed.

- Implement a schedule for annual fit testing for impacted employees.

- Evaluate the program periodically and when changes occur.
